

PRESENTATION

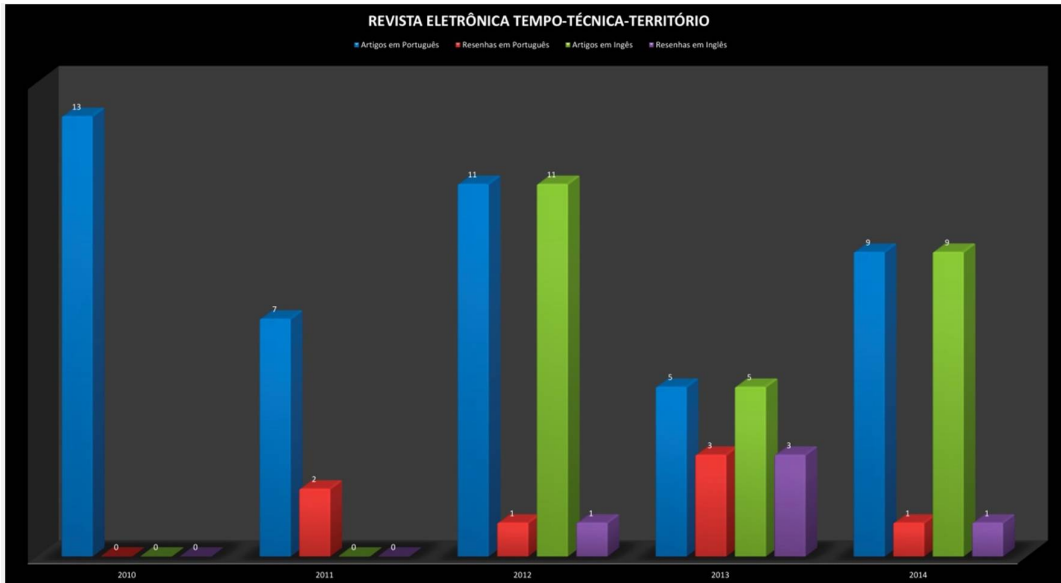

We start effectively our academic project of systematically publishing the Electronic Journal: Time - Technical - Territory in 2010, putting in cyberspace articles, reviews and technical reports from different segments, but with points of convergence. From 2012 the magazine became bilingual (Portuguese-English) and thus our work demands have increased, but also broaden the geographic reach of contributions. Up to the present moment (2010-1014) published 45 articles in Portuguese and 25 in English. The access to our magazine computed from 2012, when it became international, reveals an initial interest from neighboring countries and Portugal and later a process of increasing accessibility of European countries, the United States and some countries Asia (Japan and China). These spatial statistics are presented below. Happy reading the articles that make up the Volume 6, Number 1 of this Journal.

A hug to everyone and all!

A hug to everyone!

The Editors.
